

Andrey Lapchik

Full-stack developer

Riga, Latvia contact@andryshka.com +371 28176717 andryshka16

About me

- Full-stack developer with three years experience shipping live iGaming and real-time trading platforms
- Skilled in real-time rendering, low-end device optimisation, and performance under load
- Deep expertise in React / PixiJS on the frontend and NestJS on the backend
- Worked daily with backend, QA, design and product across in-office and international teams

Experience

- **Dec 2025 – Present → Frontend Developer, PLS™**
Building game clients and real-time interfaces for live-streamed iGaming, with mobile performance in focus
- **Mar 2025 – Dec 2025 → Full-stack Developer, Cryptonit**
Promoted to full-stack, owning the real-time market-data pipeline - WebSocket, Redis caching, and backpressure handling under load
- **Aug 2024 – Mar 2025 → Lead Frontend Developer, Cryptonit**
Led frontend development of a crypto trading terminal with a small team - charting, order entry and a virtualised order book
- **Jul 2023 – Aug 2024 → Freelance Developer**
Delivered 10+ frontend and e-commerce projects for international clients, from initial requirements through deployment and ongoing support

Achievements

- Owned frontend architecture and data layers on two games built from scratch
- Improved mobile performance on low-end devices by redesigning the animation rendering pipeline
- Reduced latency across real-time data pipeline through message contract optimisation
- Built and deployed multiple production-ready trading platforms on Solana and BSC networks

Education

- University of Latvia – Computer Science Bachelor's program, 2024 - 2025
- Riga State Classical Gymnasium, Information Technology Specialisation, 2021 - 2024
- Datorium coding courses – Python & JavaScript (2022)
- Fireship courses – Next.js (2023)

Tech stack

Languages

TypeScript, JavaScript, HTML, CSS, SQL, Python, Rust (basic)

Frontend

React, Next.js, TypeScript, PixiJS / WebGL, Canvas API, Redux, Zustand, MobX, TradingView Advanced Charts, Chart.js

Backend

Node.js, NestJS, WebSockets, Protobuf.js, REST APIs, GraphQL, gRPC, SSE, JWT, OAuth 2.0, API security (CORS, CSRF)

Databases

PostgreSQL, Redis, MySQL, MongoDB, TypeORM

Other tools

Git, Docker, Vite, Webpack, Storybook, CI/CD pipelines, Nginx

Soft skills

- Cross-functional team collaboration
- Constructive feedback in code review
- Clear client and stakeholder communication
- Independent work across time zones
- Adapting across different product domains

Languages

English (advanced), Russian (native), Latvian
